DETAILED ACTION

Applicant's preliminary amendment filed on 08 October 2003 is acknowledged and entered. Following the amendment, the original claims 1-22 are canceled, and the new claims 23-42 are added.

Currently, claims 23-42 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 23-35, and 42 in part, drawn to a method for treating autistic disorder with digestive enzymes, classified in class 424, subclass 94.1.

II. Claims 36-41, and 42 in part, drawn to a method for treating ADD or ADHD with digestive enzymes, classified in class 424, subclass 94.1.

The inventions are distinct, each from the other because:

Invention I is distinct from Invention II because they are the methods of treating different medical conditions, which involve distinct patient populations, have distinct clinical manifestations, distinct features in progress and prognosis, and require different therapies. Therefore, each group requires a separate search of the prior art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different recognized divergent subject matters, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143), and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
